

I don not want any solicited calls to my household. If a company or person wants to sell their product, let them make a commercial for all to see. There are many avenues for these companies to sell a product without infringing on my rights to privacy. These phone calls are a form of harrassment that I shouldn't have to experience.

I think the Federal Government should amend their policy to a higher level than New Jersey has established. If a government gives in to corporate pressure, it no longer is worker for the people.
